APPLICANT:

PLEASE COMPLETE AND ATTACH THE FOLLOWING TO THE APPLICATION:

Incomplete Applications / Site Plan will not be accepted. If the Application / Site Plan is deemed incomplete it will be returned. Provide drawings, schematics, or permits in a manner easy for City Staff to review and comment.

- Vicinity and location map
- Site Plan identifying the following
 - Proposed access location to Public Street
 - Existing access location to Public Street
 - Existing adjacent/neighbor accesses to Public Street
 - Existing location and name of drainage/surface water
 - Proposed drainage facilities type and location
 - Contours/topography from the best available source
 - Existing street names and locations
 - Proposed street names and locations
 - Existing City Right Of Way(s)
 - Existing easement locations
 - Proposed easement locations
 - Existing water, sewer (size, type)
 - Proposed water, sewer (size, type)
 - Proposed solid waste pick up
- Written estimate of trips to and from the site daily for the proposed use. Specifically list trucks and other traffic.
- Written estimate of square footage area for the footprint of non-residential buildings
- Written estimate of proposed cut & fill quantities in cubic yards

Is this project within the City limits? Yes No UGA? Yes No

COMMERCIAL BUILDING PERMIT

PROCEDURE FOR COMMERCIAL BUILDING PERMIT

PRE-SUBMISSION CONFERENCE

Before applying for a Commercial Building Permit, the applicant shall apply for a Pre-submission conference. A pre-submission conference is generally required prior to issuance of a Building Permit for any development other than one single family or duplex, but may be required for these as well, if site conditions warrant. Contact the building department for a pre-submission conference application.

A pre-submission conference allows the applicant to become familiar with City policies, plans and development requirements, and to coordinate all necessary permits and procedures. Meetings are typically held on Wednesdays. The applicant should submit six (6) copies of their preliminary site plan and proposed development one (1) week prior to the pre-application conference.

Some projects may require other planning or zoning actions. For example, a project may require a zoning variance or Conditional Use Permit. The Planning Department will notify the applicant of any such requirements during the pre-application phase and assist the applicant with the coordination of these procedures.

APPLICATION FOR BUILDING PERMIT

STEP 1: BUILDING PLANS

Once the pre-submission application has been reviewed and approved, the applicant is required to submit the following:

- Seven (7) complete sets of building plans and a PDF.
- Completed Building Permit application.
- Three (3) copies of a soils report, three (3) copies of an erosion control plan.
- Two (2) sets of structural calculations.
- Two (2) sets of building specifications (if available).
- Two (2) sets of NREC and Ventilation Code specifications and calculations.
- Three (3) sets of fire alarm specifications, if applicable.
- Three (3) sets of fire sprinkler specifications if, applicable.

- Six (6) sets of civil drawings including all utilities and drainage.
- Six (6) sets of landscape plans.
- Seven (7) sets of site/architectural plans.

These plans should be submitted together (civils and building separate) with a plan review fee to initiate the plan review process. Contact the Building Department at 426-9731 to establish the amount of the deposit.

The applicant will be required to submit the following based upon the type of construction. Please check with City staff for requirements.

- Fill and Grade permit. Any filling and/or grading may require a permit.
- Right of Way Permit. Utility Work in the right of way, a new driveway approach, sidewalks, etc. would require a right of way permit.
- A Utility Application for service must be completed and all pertinent fees paid.

It is recommended that you contact Mason County P.U.D. #3's Service Engineering Department to learn of the requirements pertaining to electrical service extension policies. For information and an electrical service application, call P.U.D. #3 Service Engineering Department at (360) 426-0888. To learn about the 1997 Non-Residential Energy Code Compliance and Conservation Credits, call P.U.D. #3 Conservation at (360) 426-0777.

STEP 2: PLAN REVIEW AND PRE-CONSTRUCTION MEETING

The Building, Engineering, Fire, Planning, Police and Public Works departments review civil plans, including landscape and site plans. The building plans are reviewed simultaneously by the Building Department. After plans are approved, the permits are then prepared for issuance.

Once the building permit is issued, a pre-construction meeting may be scheduled with City staff and the contractor, owner, developer, and/or architect. This meeting helps avoid any problems with traffic control, drainage, keeping streets clean, scheduled utility connections and inspections.

STEP 3: CONSTRUCTION AND PERIODIC INSPECTION

After Step 2 has been completed, and the Building Permit has been issued, construction may begin. During construction, members of the Building, Engineering, Fire and Planning departments, will conduct various inspections. Contact Community & Economic Development to request inspections (i.e. building inspections, Site Plan Review inspections, etc.).

CALL TWO WORKING DAYS BEFORE YOU DIG
 1-800-424-5555
www.callbeforeyoudig.com
 Utilities Underground Location Center

STEP 4: FINAL INSPECTION AND CERTIFICATE OF OCCUPANCY

Once construction is completed, the developer, builder or contractor must contact the Building Department for final building inspections (**24 hour minimum notice is required**). If Site Plan Review was required, final site plan inspection will be required prior to occupancy and shall be scheduled with the Development Coordinator along with final building inspections. After these inspections are completed, the developer will receive a checklist summarizing conditions that must be met before a Certificate of Occupancy can be issued. Once these conditions are met, the Certificate will be issued and the building will be ready for occupancy.

It is a violation of City ordinance to occupy a building without a Certificate of Occupancy.

NOTICE

Per Section 5.04.030 of the Shelton Municipal Code all contractors and sub contractors, who conduct business within the City limits, are required to have a City of Shelton Business License.

<p><u>Owner's Affidavit</u> I certify that I am exempt from the requirements of the contractor's registration law RCW 18.27, and I am aware of the City of Shelton's ordinance requirements for which this permit is issued and that all work done will be in conformance therewith. No changes shall be made without obtaining approval from the Building Department.</p>	<p><u>Contractor's Affidavit</u> I certify that I am a currently registered contractor in the State of Washington and I am aware of the ordinance requirements regulating the work for which the permit is issued and all work done in conformance therewith. No changes may be made without first obtaining approval from the Building Department.</p>

IS THIS LOCATED IN THE FLOOD PLAIN? YES NO

Site Address (if applicable) _____ City _____ St. ___ Zip _____
Parcel No. _____
Legal Description _____
Describe work and total proposed project _____

Number of cubic yards to be excavated: _____
Number of cubic yards to be filled: _____
Number of cubic yards to be graded: _____

Will this be a balanced cut and fill entirely within the site? Yes No
If no: Will fill be brought on site? Yes No
Where does imported fill come from? _____
Does fill contain any potentially hazardous materials? Yes No

Will excavated material be taken off site? Yes No
If yes: Where will excavated materials be taken? _____
If yes to either import of export, identify haul route, methods proposed to keep public roads free of debris,
and submit traffic control plan if necessary. _____

Has a soil report been completed on the subject site? Yes No
If yes, include a copy with application.

Revised 8/15/17

Does the subject site contain any of the following features?

River _____ Lake _____ Wetland _____ Saltwater _____ Slope greater than 15% _____
Soft compressible soils _____ Seasonal Runoff _____ None _____

Is site designated critical area per City of Shelton? Yes No

Is site within a designated floodplain? Yes No

Will the proposed land surface modification change the points where storm water or ground water enters or exits the site? Yes No

If yes, please explain: _____

Will the proposed land surface modification change the quality, quantity, or velocity of storm water/ground water?

Yes No

If yes, please explain: _____

Is the subject site within 200 feet of a designated shoreline? Yes No

If yes, please explain: _____

What methods, will be utilized to minimize erosion and possible sedimentation into nearby waters?

Will this land modification result in the redirection of any surface water runoff onto adjacent properties?

Yes No

If yes, please explain: _____

Will surface or subsurface runoff be collected or controlled by interceptors, curtain drains, or other water collection devices once this land modification has been completed? Yes No

If yes, please explain: _____

Will the land be replanted upon completion? Yes No

If yes, with what type of plants? _____

What are the lengths and heights of slopes currently existing on the site? _____

Will this modification result in slope steeper than those currently on the site? Yes No

If so, how steep? _____

This permit becomes null and void if work authorized is not commenced within 180 days, or if work is suspended or abandoned for a period of 180 days at any time after work is commenced. I hereby certify that I have read and examined this application and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be complied with whether specified herein or not. The granting of a permit does not presume to give authority to violate or cancel the provisions of any other state or local law regulating excavation/grading or the performance of excavation/grading.

**GRADING
MINIMUM SUBMITTAL REQUIREMENTS
CHECKLIST**

Date: _____

Applicant Name: _____

Project Location: _____

For all applications:

- Five (5) sets of plans (drawings)
- All plans drawn to a generally accepted engineering scale, with titles for each drawing. Which must be legible and drawn to scale, and that the site plan must consist of a single sheet (NTS is not acceptable).

For any project, which requires construction of new public roads or existing roadway improvements, construction plans for these civil improvements are required which conform to the most current edition of the City of Shelton Engineering Design & Development Standards. Most specifically, the roadway plans shall follow the requirements of SMC Title 13, and shall stand independent of the onsite project plans.

PLAN CHECKLIST

- North Arrow
- Property tax account number(s) - Parcel Number
- Site Address
- Applicant's Name, Address, and Phone Number
- Contact person's Name, Address, and Phone Number
- Vicinity Map, including directions for difficult to find sites
- Grading quantities indicating amount of excavation and amount of fill
- All property lines and dimensions
- Property line bearings
- Existing contours* shown as dashed lines
- Proposed contours* shown as solid lines
- Minimum of 2 cross sections perpendicular to each other for each area proposed for grading with existing grades shown as dashed lines and proposed grades shown as solid lines.
- Existing and proposed drainage systems (i.e. ditch lines, culverts, catch basins, French drains, surface drainage flow direction)
- Location of any existing and proposed structures on site with distance to property lines
- Location of any structures on adjacent land which are within 15 feet of the property line or which may be affected by grading operations
- Location of existing and proposed drain fields, drain field reserve areas, septic tanks and wells
- Temporary erosion and sedimentation controls
- Easements locations and dimensions, including on site utilities
- Wetland area, seasonal and year round creeks or streams
- Slope areas over 33%
- Floodplain Zone (_____)

Additional Requirements

- All other applicable City of Shelton permits, applications and approvals, including but not limited to Public Works traffic review, building permit, Shoreline Management Master Development permit, Flood Hazard permit, ROW permit, retaining wall permit, etc.
- Grading submittal fee
- Detailed drainage plan prepared and stamped by a licensed Civil Engineer, if over 5,000 sq. ft. of impervious surface on site (including gravel parking areas), and submittal fee (note: after plan review it may be determined that a detailed drainage plan is needed for projects that do not meet this threshold).
- A note on the plans indicating, "All site work must comply with the International Building Code, Appendix J and Shelton Municipal Code, Title 13 and the City of Shelton Design and Construction and Development Standards.

*This information may be available from the City of Shelton Engineering Department

Revised 8/15/17

Filling and Grading, Sediment and Erosion Control Permit Application

International Building Code (IBC) Appendix J and Shelton Municipal Code (SMC) Title 13 have been adopted by the City of Shelton to establish:

- Regulations to control clearing, excavation, grading, and earthwork construction, including fills and embankments;
- The administrative procedures for issuing permits and fees;
- Provisions for approval of plans and inspection of this work.

Permits for grading are required if soil is moved within the City of Shelton, except as specified in Appendix J of the IBC. Additional requirements may apply within those environmentally sensitive or critical areas as identified in SMC Title 21. Erosion control plans are also required for all vegetation clearing and all grading regardless of the quantity of soil being moved.

Prior to a grading permit being issued, the applicant may be required to complete and file an environmental checklist, receive a determination of non significance (DNS) and complete the appeal period for grading, filling or excavation in critical areas as required by WAC 197-11-800. A checklist must be filed, a SEPA process completed, and the appeal period completed whenever 100 cubic yards or more of soil is moved at any location.

When a grading permit or erosion control plan is required, plans and specifications must be submitted for review which show the proposed work, state how the work is to be accomplished, and the standards of acceptance and testing. Each review of grading and/or erosion control plans may take two to six weeks.

The information listed in the checklist provided with the application for grading, excavation and the erosion control permit must be provided in order for the submitted plans to be reviewed. Only those items applicable to the particular project need to be provided in the plans and specifications submitted for a grading, excavation and erosion control permit.

DEFINITIONS:

“Clearing”	Means removing and disposing all unwanted materials from the surface, such as trees, brush, down timber or other natural materials.
“Grubbing”	Means removing and disposing of all unwanted vegetative mater from underground, such as sod, stumps, roots, buried logs or other debris.
“Excavation”	Means area or material removed to provide a suitable base for improvement.
“Cut,”	Means original ground removal to reach prescribed earth slopes or sub-grade.
“Fill”	Means the material placed above the original or in place of the natural ground line.
“Grading,”	Means any excavating or filling or combination thereof.
“Erosion”	Means the wearing away of the ground surface as a result of the movement of wind, water, or ice.

Public Works Utilities and Storm water Requirements

A Utility Application is required in order for the resident to receive City water and sewer service. These are available when building/plumbing permits are completed and submitted, please ask staff.

The applicant will completed and sign the Utility Application form and submit it along with the application fees. Incomplete applications will not be accepted and will be returned to the applicant.

Water Service

City utility staff will complete an estimate for connection. The usual water meter connection size for each single-family dwelling unit is $\frac{3}{4}$ inch. If you have questions regarding size or number of meters required, please consult with staff, Shelton Municipal Code, and the Public Works Design and Constructions Standards.

Typically the estimate is returned to the permit technician and returned for payment with the building/plumbing permits. Once the estimate is paid, City staff will tap the main and install a water meter at the property line. After all work has been completed, the actual costs will be calculated and you will be billed for any additional costs. The applicant installs the water line from the meter to the structure.

Sewer Service

Unless the City indicates otherwise in the estimate, the property owner is responsible to hire a **licensed and bonded** contractor to make the tap under the City's inspection. Please check with L&I as to the current license status of your contractor.

The usual sewer connection size for each single-family dwelling unit is 4 inches. If you have questions regarding construction requirements, type of pipe, size of pipe, or number of connections required, please consult with staff, Shelton Municipal Code, and the Public Works Design and Constructions Standards. Also note that this work will require a **Right of Way permit**.

Construction and Inspection

For construction requirements, please consult with City staff, Shelton Municipal Code, and the currently adopted Public Works Design and Constructions Standards.

CALL TWO WORKING DAYS BEFORE YOU DIG

1-800-424-5555

www.callbeforeyoudig.com

Utilities Underground Location Center

Once the construction is completed, the developer or contractor must contact the City of Shelton at (360) 426-9731 for final inspections (**48 hour notice is required**). Please note that due to staff availability days of inspection may be limited, your understanding appreciated.

Storm water Management

All construction will be required to submit an abbreviated drainage plan, which includes a Small Parcel Erosion & Sediment Control Plan. This information should be included on the site plan drawing submitted. Please consult with staff, Shelton Municipal Code, the Public Works Design and Constructions Standards (TESC).

Revised 8/15/17
